PROFILE

Junior Flutter developer focused on production-ready mobile products and reliable backend integrations. Experienced in taking applications from architecture and UI implementation through testing and release, with practical work across authentication, real-time data, messaging, notifications and APIs.

SELECTED PROJECTS

Readlinx

2026

Flutter Developer | Published mobile application

- Built and released a personal reading tracker for managing books, reading habits, progress and statistics.
- Published the Android application on Google Play and prepared the iOS release build with a production-ready Flutter architecture.

Kardeş Kütüphane

2025 - 2026

Mobile Developer | TÜBİTAK 2209-A supported project

- Built a cross-platform book-exchange product with ISBN scanning, listings, messaging, exchange offers and push notifications.
- Delivered the Flutter/Firebase application through automated tests, security-rule validation and iOS release preparation.

ARCA Tribün

2026

Mobile Developer | Çorum FK fan engagement concept

- Designed a football companion app covering news, fixtures, standings, live match events and fan predictions.
- Structured the Flutter/Supabase solution with authentication, access policies and push-ready device registration.

EXPERIENCE

Software Development Intern

2024 - 2025

Bilişim Akademisi | Ankara, Türkiye

- Completed hands-on training in network security and system security fundamentals.

High School Intern

2021 - 2022

Çorum Gaz | Çorum, Türkiye

- Supported structured workflows within the Finance and Accounting Department and gained professional workplace experience.

EDUCATION

Associate Degree in Computer Programming

2024 - 2027

Hitit University | Expected graduation: 2027

Focus: mobile application development, cloud systems and software architecture.

Vocational and Technical High School

2018 - 2022

Şehit Emin Güner Vocational and Technical Anatolian High School

Specialization in software development and web technologies.
